

## “Bird”

Words and music by Donny Douglas

### Intro

Dm F G, Dm F G, Dm F G, Dm F Em7

### Verse

Dm F G

There's a bird in the sky,

Dm F G

flying straight flying high

Dm F G

Wings cut through blue crystal sky,

Dm F Em7

turns away from northern lights.

Dm F G

Southern winds steer southward flight,

Dm F G

Through breezy days and starry nights,

Dm F G

See's land ahead, I'll take my time,

Dm F Em7

Morning brings sweet smells, sublime

### Chorus

Am F G F Am

Bird you see what you need, you take it that's good,

Am F G F Am

Bird you know what you see and I wish we could

Am      F           G      F           Am

Lives are given to live, a gift understood,

Am      F                      G                      F                      Am      F           G           F           C

But we take them through greed and starve when there's food

### *Second verse*

Flying high overhead  
The world looks small, all creatures bed,  
Rest we will after the flight,  
Leave the world for constant night.  
Man has come and he will go,  
A single act in this show.  
Will the house be brought down?  
When the man becomes the clown.

### *Chorus*

### *Solo – over verse*

### *Repeat Chorus*

### **Key - change**

Bm      G                      A                      G                      Bm

Bird you see what you need, you take it that's good,

Bm      G                      A                      G                      Bm

Bird you know what you see and I wish we could

Bm      G           A           G                      Bm

Lives are given to live, a gift understood,

Bm      G                      A                      G                      Bm      G           A           G           D

But we take them through greed and starve when there's food
